DATE MAILED: 02/21/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/689,785

Applicant(s)

SADOWSKI, GREG

Examiner

Daniel J Chung

Art Unit

2672

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-23 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-23 is/are rejected.
- 7) ☒ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on ____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). ____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) ____ 6) ☐ Other: ____

DETAILED ACTION

Drawings

The drawings are not objected to by the Examiner.

Specification

Please review the application and correct all informalities.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Cohn (5,712,995).

Regarding claim 1, Cohn discloses that the claimed feature of a method for spatially compositing digital video images with a tile pattern library, comprising the steps of: b) choosing a tile pattern ["saved layout", "predefined layout"] from the tile pattern library ["a file", "other storage"] c) creating a compositing window [i.e. "exterior or outer window/layout" in Fig 8] within a display area [140] of a compositor, wherein a shape of created compositing window matches a shape of a periphery of chosen tile pattern and

Art Unit: 2672

wherein created compositing window is formed by pixels within the display area; d) decomposing created compositing window into a number of tiles ["panes" or "windows"; 210-212], wherein a shape and a position of each of the tiles matches a shape and a position of a corresponding tile in chosen tile pattern, and wherein each of the tiles is formed by pixels within the display area; assigning each of the tiles [210-212] to a corresponding digital video display unit ["application"; 150-152]; and f) receiving, at each of the tiles, an image output of assigned corresponding digital video display unit, thereby spatially compositing digital video images with a tile pattern library. (See Abstract, Fig 6-8, Fig 11, col 34 line 45-54, col 38 line 59-62, col 41 line 51-col 42 line 19)

Regarding claim 14, claim 14 is similar in scope to the claim 1, and thus the rejection to claim 1 hereinabove is also applicable to claim 14.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4,8-13 and 15-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cohn in view of Hashimoto et al (6,515,673).

Regarding claim 2, Cohn fails to teach that the step of counting digital video display units whose image outputs will be spatially composited by the compositor such that counted digital video display units determines a maximum for the amount of tiles in chosen tile pattern. However, Hashimoto et al discloses that immersive video involves creating [view window determination; 953] multiple environment maps [tiles]. (See Fig 5-9, col 11 line 38-57) It would have been obvious to one skilled in the art to incorporate the teaching of Hashimoto et al into the teaching of Cohn, in order to provide proper number of windows or tiles for optimizing system's performance, as such improvement is also advantageously desirable in the teaching of Cohn for eliminating unnecessary pane partitions steps in Cohn's system thereby save processing time and cost.

Regarding claims 3 and 10, refer to the discussion for the claim 2 hereinabove, Hashimoto discloses that each frame in a dynamic sequence of frames of digital video images. (See col 3 line 5-9)

Regarding claim 4, Cohn discloses the parameters that define each of the tiles are variable. (See Fig 8, Fig 9, Fig 13)

Regarding claim 8, Cohn discloses that steps are performed by a tile compositing controller. (See Fig 6)

Regarding claim 9, Cohn discloses that after step d), the step of communicating, to the compositor, the parameters that define the compositing window and the parameters that define each of the tiles. (See Fig 6, Fig 14-15)

Regarding claims 11-13, Cohn discloses that communicating step occurs through a channel separate from a channel used to communicate a frame of digital video images, and communicating step minimizes an amount of data, obtaining an index code, needed to convey the parameters that define the compositing window and the parameters that define each of the tiles. (See Fig 5, Fig 9, col 10 line 18-54)

Regarding claims 15-17, claims 15-17 are similar in scope to the claims 2 and 8-9, and thus the rejections to claims 2 and 8-9 hereinabove are also applicable to claims 15-17.

Regarding claims 18-19 and 21, Cohn fails to teach that communications medium meets Digital Visual Interface specifications, and communications medium is a Transitional Minimized Differential Signal data link and Inter Integrated Circuit bus. However, this would have been obvious to one having ordinary skill in the art at the time

of Applicant's invention, in order to provide correct data type through a communication mediums, which are available for commercial.

Regarding claims 20 and 22-23, claims 20 and 22-23 are similar in scope to the claims 10 and 12-13, and thus the rejections to claims 10 and 12-13 hereinabove are also applicable to claims 20 and 22-23.

Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cohn in view of Hashimoto et al (6,515,673) and further in view of Smith et al (6,223,183).

Regarding claims 5-7, Cohn fails to teach that an area of each of the tiles is a inverse function of a complexity of the image output of assigned corresponding digital video display unit. However, Smith discloses that implementing specify sets of views [tile] to describe the complex objects. (See col 6 line 4-15, col 8 lien 60-65) It would have been obvious to one skilled in the art to incorporate the teaching of Smith into the teaching of Cohn, in order to improve readability of complex image, as such improvement is also advantageously desirable in the teaching of Cohn.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel J. Chung whose telephone number is (703) 306-3419. He can normally be reached Monday-Thursday and alternate Fridays from 7:30am- 5:00pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael, Razavi, can be reached at (703) 305-4713.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks
Washington, D.C. 20231

or faxed to:

(703) 872-9314 (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA, Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office whose telephone number is (703) 306-0377.
